

PDI REPORT							
DEALER NAME:							
DEALER CODE:						Date:	
P D I REPORT :						Consignment Recd Date:	
Transporter :						Invoice No & Date:	
Truck Reg. No :						Date of PDI Done :	
	1	2	3	4	5	6	7
Engine No.							
Chassis No.							
Gear Box No.							
SAFETY							
Engine Oil Level (If less than Min. level) - Mention filled quantity in ml							
Gear Box Oil Level (If less than Min. level) - Mention filled quantity in ml							
Brake Oil (fluid) Level (If less than marked level) - Mention filled quantity in ml							
Coolant Level (If less than marked level) - Mention filled quantity in ml							
Brake Pedal setting / Brake operation							
Check All Nuts, Bolts							
Check Fuel System (Leakages in fuel lines)							
Checks AVM Mountings							
Check All Electrical Writings							
Check for welding (Uncovered Joints / poor finish / cracks,welded)							
Check For Battery Electrolyte Level & Mtg. code of battery							
Check tightness of drain plug of Gear Box / Engine oil sump							
Check for Oil leakage							
Check for kits - fuse,bulb,first aid tools							
Check for safety triangle,jack and handle,wheel spanner proper fitment on wheel nut.							
FUNCTIONAL							
Check Ignition Switch (Operation) - for two position							
Check for door locking with key and manual.							
Check All Control Switches and bulbs (Mention only faulty,if any)							
Check For Proper Gear engagement of all 5 gears.							
Clutch Cables - operation sluggishness , rubbing ,loosing							
Check for steering noise and smooth rotation, self centering,vibration and pulling							
Check Wiper Working							
Check Speedo Meter working							
Check Tyre Pressures (Incl. Spares Wheel)							
Check All Fuses as per Rating							
Check Steering lock operation							
Servicability issues observed If any							
AESTHETICS - Please mention the correct location							
Part Missing or Not supplied by PDI Kit							
Check For Scratches / Dents / Damages							
Check twist at Rear Suspension (Long member end) -							
Check Driver Seat							
Check for paint problem - Poor paint / Run down							
Check For gaps between - Doors,side panels ,tray to rear panel of cabin engine inspection cover with tray							
Important							
Check for ECU flashing sticker (QR code) -							
HEX:105W00K492 hex on dome LH inner side							
Check Instrument cluster - Key ON - No MIL lamp / Check engine lamp ON							
Check - Oil pressure & Battery indication ON when switch ON and indication OFF when engine start							
Check startability - Crank vehicle- should get cranked without delay							
Check wiring harness Injector routing - clamp fitment							
Check wiring harness for 'T' & 'P' sensor coupler taping and clamping							
Check coolant hoses proper tightening							
Check passenger door - Check firmness of the latch bolt (the excess play)							
Check air filter assembly for proper cap fitment on filter tube (at filtered air side)							
Check door vent glass screws for tightness							
Check cargo door lock assembly screws for tightness							
Check throttle grip (EHT) - For free movement							
Check Rr. brake switch for proper fitment - gap between pedal and switch plunger							
Check tank unit nut for tightness							
Check starter motor wire nuts for tightness							
Check alternator wire nuts for tightness							
REMARK
